Students Feed back on institutional Governance

The college has a very powerful and effective mentoring system (advisory system) to support activities of the students. The advisory system consists of a senior advisor and an advisor for approximately 30 students of each batch. The system helps the students in their academic and personal matters and provides all support in case of any grievance. The advisors maintain good rapport with parents to support such activities. In addition to that, Student Grievance Cell and a Women's Grievance Cell are functioning effectively in the campus to address grievances if any, of students. The college has appointed a professional counsellor on a regular basis to provide personal support students. Separate Counselling Room is provided for the same.

- 9.4.2 The question paper for objective type examinations will be given in the form of Question Booklets. Candidates will be permitted to take the question booklet with them at the end of examination.
- 9.4.3 For Engineering Entrance Examination, each Paper will have 120 questions to be answered in 150 minutes.
- 9.4.4 **Scoring, negative marks:** For each correct response in the Engineering Entrance Examination, the candidates will be awarded FOUR marks, and for each incorrect response, ONE mark will be deducted from the total score. For each paper, in the event of failure to answer a question, (that is, no response is indicated against a question in the answer-sheet) no deduction from the total score will be made. More than one answer indicated against a question will be deemed as incorrect response, and will be awarded negative marks. Therefore the candidates are advised not to attempt an answer, if they are not sure of the correct response, because mere guessing may lead to choice of wrong answers, with the consequent penalty of negative marks. However, the candidates who fail to answer at least one question in each paper will be disqualified and cannot find a place in the Engineering Rank list. Similarly, a candidate who fails to answer at least one question in Paper-I of the Engineering Entrance Examination will be disqualified and cannot find a place in the B.Pharm Rank list.

9.5 **The standard of the Examination:**

- 9.5.1 The standard of the Entrance Examination will be that of Higher Secondary or equivalent examinations. The syllabi for all the subjects for the Entrance Examination are given in Annexure I of the Prospectus.
- 9.5.2 The syllabi published in the Prospectus are only outlines of the topics that will be covered in the examination. Since the examinations are of highly competitive nature and the cream of the competing students has to be found out through a process of elimination, questions of applied nature of higher order on the topics included in the published syllabi can be expected. Questions are not based on NCERT textbooks or any other textbooks exclusively.

(b) Rank list for Engineering courses

- Equal weightage of 50:50 shall be given to the score obtained in the Entrance Examination for Engineering (Paper I & Paper II put together), and the grade/marks obtained in the final year of the qualifying examination for Mathematics, Physics and Chemistry put together, after effecting the standardization procedure as described in Clause 9.7.4 (b)(iii). In case, the candidate has not studied Chemistry, the marks obtained in Computer Science shall be considered. In case, the candidate has not studied Chemistry and Computer Science, the marks obtained in Biotechnology shall be considered. In case, the candidate has not studied Chemistry, Computer Science and Biotechnology, the marks obtained in Biology shall be considered.
- The final year marks of the qualifying examination of each subject Mathematics, Physics and Chemistry/Computer Science/Biotechnology/Biology of the students who have passed the subject, received from the respective Boards, shall be transformed out of 100. The marks of the three subjects shall be computed out of 300 after effecting standardization in each subject.
- The formula for standardization as has been approved by the Expert Committee constituted vide G.O.(Rt)No.1758/2011/H.Edn. dated.03.11.2011: The marks secured by a student in the qualifying examination from any Board will be standardized with respect to the statistical parameters such as Global Mean and Global Standard Deviation.

The standardized mark Y_{BG} of a candidate of the stream (B) standardized with respect to the global reference stream (G) for the subject is

$$Y_{BG} = M_G + S_G \left(\frac{X_{Bj} - M_{Bj}}{S_{Bj}} \right)$$

Where M_{Bj} and S_{Bj} denote respectively the Mean and Standard Deviation of the marks out of 100 of all students who have passed in a subject of the final year of qualifying examination of any stream (B) of the year j and X_{Bj} is the mark of a candidate out of 100 for the subject in the stream (B) of the year j.

The Global Mean (M_G) of a subject is the combined average of the marks of that subject out of hundred of all students who have passed in that subject (Mathematics, Physics and Chemistry/Computer Science/Biotechnology/Biology as the case may be), of the final year of the Qualifying Examination of Kerala HSE, Kerala VHSE, CBSE and CISCE Boards taken together for the period from 2009 to 2020. The Global Standard Deviation (S_G) of the subject is the combined standard deviation of marks of that subject out of hundred of all students who have passed in that subject (Mathematics, Physics and Chemistry/Computer Science/Biotechnology/Biology as the case may be), of the final year of the Qualifying Examination of Kerala HSE, Kerala VHSE, CBSE and CISCE Boards taken together for the period from 2009 to 2020.

- The subjects of the qualifying examination considered for the computation of marks for the purpose of ranking shall be Mathematics, Physics and Chemistry. The marks of the concerned subject out of hundred or an equivalent mark out of hundred, as given in the final year mark list of the Qualifying Examination of any plus two stream shall be considered. In case, the candidate

has not studied Chemistry, the marks obtained in Computer Science shall be considered. In case, the candidate has not studied Chemistry and Computer Science, the marks obtained in Biotechnology shall be considered. In case, the candidate has not studied Chemistry, Computer Science and Biotechnology, the marks obtained in Biology shall be considered.

- (v) Standardization of the marks of the subjects as per the clauses 9.7.4(b)(iii) & (iv) will be effected under the supervision of the Authority concerned. The standardized mark Y_{80} shall be taken as it is obtained from the formula given in clause 9.7.4 (b) (iii) .The sum of the standardized marks of three subjects Mathematics, Physics and Chemistry/Computer Science/Biotechnology/ Biology as the case may be, shall be limited to three hundred.
- (vi) The score obtained by the candidate in the Engineering Entrance Examination (Paper I & Paper II put together) shall be computed out of 300, and added to the total standardized marks of Mathematics, Physics and Chemistry/Computer Science/Biotechnology/Biology as the case may be, of the final year of the Qualifying Examination, computed out of 300, both corrected to four places of decimals. The rank list for Engineering Courses shall be prepared based on the total marks obtained out of an Index mark of 600, computed as above.
- (vii) If any Board/Authority provides results by letter grades/CGPA/OGPA etc., the candidate concerned shall have to submit the marks equivalent as required, from the Board/Authority concerned, failing which the decision on standardization of marks shall be taken based on the available information by the Committee of Statisticians constituted vide G.O.(Rt) No.1061/2017/H.EDN dated.07.06.2017, which shall be final and binding on the applicant.
- (viii) If any Board/Authority fails to provide data required for the process of standardization for any year, the mean and standard deviation available for the nearest year after the year of passing of the candidate for the concerned Board/Authority shall be considered for standardization of marks and such decision shall be final and binding on the applicant.
- (ix) If any Board/Authority fails to provide data requested and required for the process of standardization and the data for the nearest years after the year of passing of the candidate are also not available, then the mean and standard deviation of CBSE for the respective years, or in the absence of such information from CBSE, the mean and standard deviation of CBSE available for the nearest year after the year of passing of the candidate shall be considered for standardization of marks and such decision shall be final and binding on the applicant.

You are also given the value of "K" i.e. the total kilometers the car can drive on each sub-track. If the car can't cover a sub-track, you can add any unit of Petrol in it. With each unit of petrol added, the total kilometers your car can travel will increase by one unit.

Addition b) Multiplication.

Reverse first k elements of the queue.

You are in a party of N people, where only one person is known to everyone. Such a person may be present in the party, if yes, (s)he doesn't know anyone in the party. Your task is to find the stranger (celebrity) in party. You will be given a square matrix $M[i][j]$ where if an element of row i and column j is set to 1 it means ith person knows jth person. You need to complete the function `getId()` which finds the id of the celebrity if present else return -1. The function `getId()` takes two arguments, the square matrix M and its size N. Note: Expected time complexity is $O(N)$ with constant extra space.

Design a data-structure **SpecialStack** (using the STL of stack) that supports all the stack operations like **push()**, **pop()**, **isEmpty()**, **isFull()** and an additional operation **getMin()** which should return **minimum** element from the SpecialStack. Your task is to **complete all the functions**, using stack data-Structure.

Reverse a string using stack.

Given a string S consisting of opening and closing parenthesis '(' and ')'. Find length of the longest valid parenthesis substring.

TREES

- Traverse the above Binary search tree recursively in Postorder.

Write a C program to count the number of nodes in the binary search tree.

TECHNICAL INTERVIEW QUESTIONS

MICROSOFT

Rotate an array by k positions inplace

Eg. i/p [1, 2, 3, 4, 5] k=2

o/p [4, 5, 1, 2, 3]

Rotate a matrix by 90 degree

Merge k sorted linked lists of length k

You are given n number of sticks of different lengths. Length of each stick is given in an array and we had to find the minimum cost required to make all sticks of same length. (Given that Every stick has a cost associated with it in an array to increase or decrease one unit of length.) There are n number of students in a class and there are n number of lunchboxes. Each lunch box is either a circle or a rectangle and each student has a particular priority of lunch box i.e. if the lunch box is of his priority than he will take it and go otherwise he will go back of the queue and wait for his/her turn.(Students are aligned in a queue and lunch boxes are arranged in a stack.). So given n and the two arrays, one for lunch box type and another of student priority, you have to tell how many students won't be able to eat their lunch.

AMAZON

Given a sorted array in which each element is repeated twice and one element is repeated thrice find that element in $O(\log(n))$.

Sum of two number which is closest to K but the only condition is the sum of two number must be less than K.If there is more than one answer possible, print any.

Ex: Array: {2, 1, 4, 9, 2, 3, 8, 3, 4} and k = 18

Ans: 9, 8

Ex: Array: {2, 1, 4, 9, 2, 3, 8, 3, 4} and k = 12

Ans: 9, 3 or 8, 4

You are given an array A of size m*n matrix. It contains 1, 0 where 1 means path is allowed and 0 means path is not allowed. One cell contains '9'. You have to start with cell (0, 0) and find out whether it is possible to reach at the cell which contains '9'.

Ex: A: {1, 1, 0}

{9, 1, 0}

{0, 0, 1}

Ans : 1

Ex: A: {0, 1, 0}

{9, 1, 0}

{0, 0, 1}

Ans : 0

Clone a binary tree

Given an $n \times n$ matrix, where every row and column is sorted in non-decreasing order. Print all elements of matrix in sorted order.

Given an array `arr[]` and a number K where K is smaller than size of array, the task is to find the K^{th} smallest element in the given array. It is given that all array elements are distinct.

Expected Time Complexity: $O(n)$

SAMSUNG

Write a code to determine the shortest path(1 is path 0 means blockage) in a binary matrix.

Write a code to determine the minimum index sum of the coinciding character of two character arrays.

SAP LABS

Given a boolean matrix `mat[M][N]` of size $M \times N$, modify it such that if a matrix cell `mat[i][j]` is 1 (or true) then make all the cells of i^{th} row and j^{th} column as 1.

IIC ACTIVITIES FOR THE YEAR 2019

ICT ACADEMY WORKSHOP FOR SHORTLISTED STUDENTS OF IDEA FEST '19

Kerala StartUp Mission in association with ICT Academy of Kerala organized a 2 day workshop for the shortlisted students of Idea Fest'19, on "Effective Presentation Skills and Idea Pitching" on 9th and 10th January 2019. The program was held at Jubilee Hall from 10:00 am to 4:00 pm on both days. There were a total of 65 participants from Engineering/Polytechnic/Arts & Science Colleges in the districts of Kollam and Pathanamthitta. The session was handled by Mr. Nidhin Das, Company Secretary and Lead HR at ICT Academy of Kerala. The first day was a session on idea pitching. Students were made familiar with the various aspects such as one's body language and attitude that should be taken care of for an effective pitching. They were also given an idea about how to prepare the slides and about the contents to be on each of the slide. Methods for managing the allotted time for presentation were also highlighted. The students were then asked to come up with presentations for Day 2, on account of all what they learned in Day 1. On Day 2, the students were made to pitch their ideas using a ppt. The judging panel was lead by Mr. Nidhin along with two of his colleagues from ICT Academy of Kerala. On finishing the presentation, the students were scrutinized with questions and suitable improvements were suggested.

Student's assessment of Faculty system in place

The institution encourages the practice of obtaining feedback from various stakeholders such as students, alumni, faculty from other institutes, parents and eminent personality from Industry and Government organisations. The class committee meetings that are held periodically provide a platform for the students to discuss academic and nonacademic matters. Parentteacher association meetings are held periodically. Their suggestions are incorporated in improving the curriculum. The alumni surveys and employer surveys are conducted to give constructive suggestions in improving the curriculum. The valuable suggestions from industrial personnel during meetings/industrial visits, in improving the curriculum needs to match with the needs of the industry are duly communicated to the University. The institute also collects feedback from the recruiters on the performance of the students. This enables the institution to understand what industry expects from the students and modify the action plan accordingly. The college is often visited by academicians within India and also from abroad. Their views on the curriculum are obtained and efforts are made to incorporate the same. The institution takes part in the curriculum development process through appropriate analysis of feedback given by the various stake holders from time to time and makes suggestions for modifying curriculum. All the suggestions from various stakeholders are communicated to the University through syllabus committee members, BoS meetings or during syllabus revision.

A company pays its employees on a weekly basis. The employees are of four types. Salaried employees are paid a fixed week salary regardless of the number of hours worked, hourly employees are paid by the hour and receive overtime pay (ie 1.5 times their hourly salary rate) for all hours worked in excess of 40 hours, commission employees are paid a percentage of their sales and base salaried commission employees receive a base salary plus a percentage of their sales. For the current pay period, the company has decided to reward salaried commission employees by adding 10% to their base salaries. The company wants you to write an application that perform its pay roll calculation polymorphically. The employee class is abstract and has the members name and employee id and the abstract method Earnings(). Salaried Employee, CommissionEmployee and Hourly Employee are derived classes of Employee and BaseSalariedCommissionEmployee is to be derived from CommissionEmployee. Proper implementation of Earnings() should be provided in the subclass.

Create a superclass, Student, and two subclasses, Undergrad and Grad. The superclass Student should have the following data members: name, ID, grade, age, and address. The Student should have at least one method: boolean isPassed (double grade). The purpose of the isPassed method is to take one parameter, grade (value between 0 and 100) and check whether the grade has passed the requirement for passing a course. In the Student class this method should be empty as an abstract method. The two subclasses, Grad and Undergrad, will inherit all data members of the Student class and override the method isPassed. For the UnderGrad class, if the grade is above 70.0, then isPassed returns true, otherwise it returns false. For the Grad class, if the grade is above 80.0, then isPassed returns true, otherwise returns false. Create a test class for your three classes. In the test class, create one Grad object and one Undergrad object. For each object, provide a grade and display the results of the isPassed method.

9	Configure network using Link State Vector Routing Protocol Distance Vector Routing Protocol Software :Packet Tracer Software
10	Write client and server programs that communicate using your library. The server will listen for messages and send back acknowledgements. The client will send messages and listen for acknowledgements. The client will consider a message delivered once it receives an acknowledgment and resend an unacknowledged message after a timeout. After a finite number of resent messages, the client will give up and report an error. The packet size of the data is defined by the user. If the acknowledgement message is not received in a user defined amount of milliseconds, the message is resent in a user defined number of times until the program moves on to the next packet of data. The server program outputs the received data to a file. Measure the reliability of the network as a function of timeout and throughput. Use timeouts ranging from 0ms to 200ms, and datagram sizes of 512 bytes and 8 kbytes. Show your measurements on graphs of packet loss as a function of timeout with one line for each datagram size.
