

**TKM COLLEGE OF ENGINEERING, KOLLAM-5**

**FIRST SERIES TEST- PG2- MARCH- 2016**

**Time Table**

| <b>FN (10-12)</b>                 | <b>29-03-16 (TUESDAY)</b> |  | <b>AN (2-4)</b> |
|-----------------------------------|---------------------------|--|-----------------|
| Project implementation and review | C-SECM                    | Analysis and design of ERS             |                 |
| Airconditioning system design     | M-IRCE                    | Refrigeration machinery and components |                 |
| Wireless communication            | T-CS                      | Estimation and detection theory        |                 |
| Advanced data mining              | R-CS&E                    | Advanced computer architecture         |                 |
| Digital control theory            | E-IIC                     | Industrial automation                  |                 |
| Flexible manufacturing systems    | M-CIM                     | Computer aided inspection              |                 |
|                                   |                           |  |                 |

| <b>[10-12] FN</b>                   | <b>30/ 3 / 2016 [WEDNESDAY]</b> |   | <b>AN [2-4]</b> |
|-------------------------------------|---------------------------------|---|-----------------|
| FEM                                 | C-SECM                          | Advanced PSC Design                         |                 |
| Measurements in thermal engineering | M-IRCE                          | Design of cryogenic equipments and systems  |                 |
| Communication network               | T-CS                            | Ultra Wide Band Communications              |                 |
| Advanced operating system design    | R-CS&E                          | Advanced topics in distributed systems      |                 |
| Nonlinear control systems           | E-IIC                           | Bioimaging modalities/Electric drives       |                 |
| Advanced material removal process   | M-CIM                           | Computer aided process planning and control |                 |
|                                     |                                 |   |                 |

| <b>[10-12] FN</b>                            | <b>31/ 3 / 2016 [THURSDAY]</b> |  | <b>AN [2-4]</b> |
|--|--------------------------------|--|-----------------|
| Production and Materials mangement           | C-SECM                         |  |                 |
| Nano-technology                              | M-IRCE                         |  |                 |
| Nanoelectroninc devices and circuits         | T-CS                           |  |                 |
| Network security                             | R-CS&E                         |  |                 |
| ng and management/fibre optics and laser ins | E-IIC                          |  |                 |
| Total quality management                     | M-CIM                          |  |                 |
|  |                                |  |                 |
